

핸드피스  
(손잡이 기구)

터치스크린

전원스위치

에너지 차단

제어장치와  
손잡이 연결선

미라드라이 제어장치

메인 스위치  
(뒤에 위치)

이동바퀴

제품구성

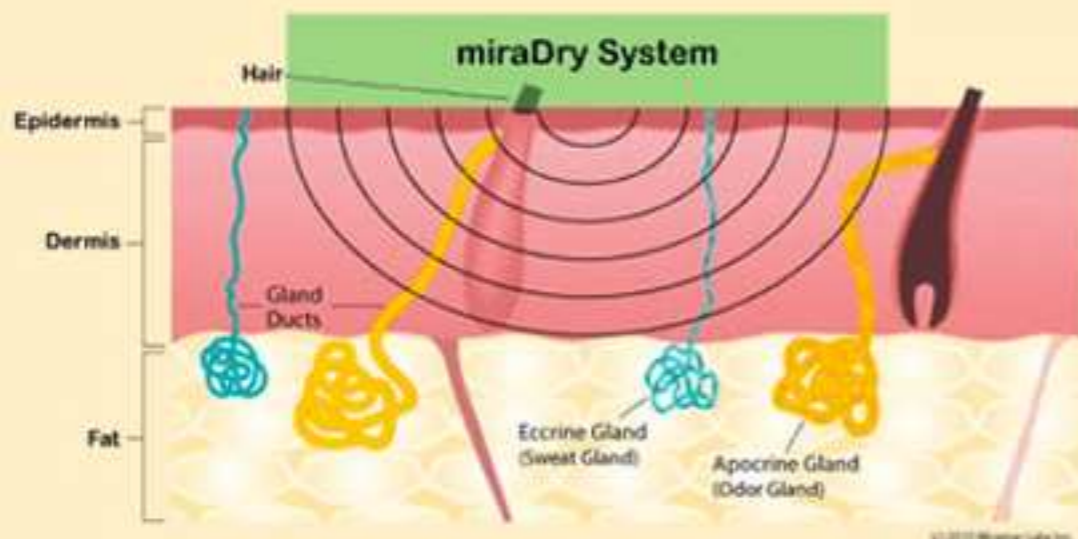

System / Consumable (Bio tip)

적응증

다한증 (허가 완료)

### 제품 원리(Product overview, Mechanism)

미라드라이는 마이크로웨이브 에너지 열로 땀샘을 파괴합니다.

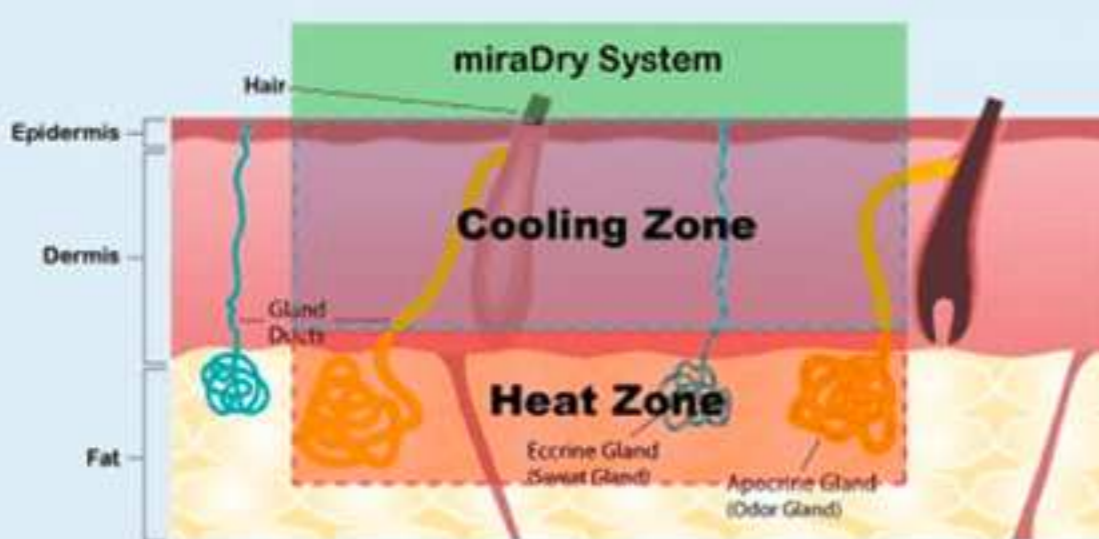

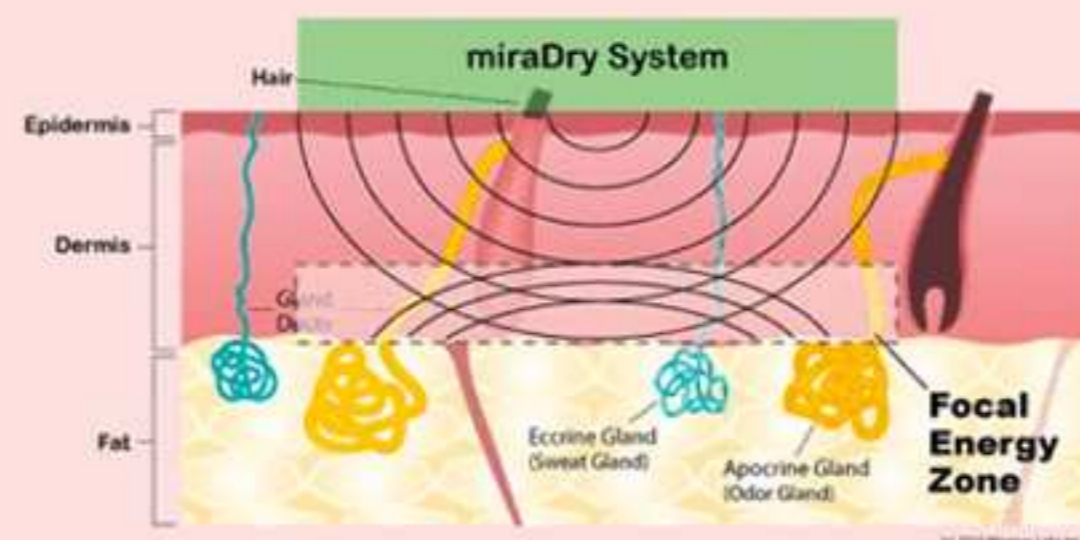

#### Precisely targeted energy

5.8GHz microwave energy is optimized to precisely target delivery to the dermal-fat interface region

#### Focal Energy Zone is created along interface, independent of skin thickness

Energy reflects and is intensified from constructive interference at the dermal-fat interface  
Deep sensitive structures remain unaffected

#### Achieves critical temperature to destroy sweat and odor glands

Hydroceramic cooling protects epidermis and upper dermis
